

MAHIPAL RAJPUROHIT

Gurgaon, Haryana, India • +91 8619066770 • er.mahipal.rajpurohit@gmail.com

PROFESSIONAL SUMMARY

Highly motivated and technically proficient Automation Engineer with over 1.5 years of comprehensive experience designing, programming, and deploying complex MES-based industrial automation architectures. Proven success in field-level installation of heavy industrial frameworks, client dealing, and advanced on-site control systems troubleshooting. Adept at customer handling and bridging shop-floor operations with localized data frameworks, perfectly positioned to provide premier product integration and elite technical engineering support for Keyence instrumentation.

TECHNICAL SKILLS

PLC Software:	Keyence KV Studio, Kostac PLC (KPP), Mitsubishi (GX Works),
HMI & SCADA:	SCADA, C-more, SCA2, Pro-face
Hardware & Sensors:	Sensors, Measuring Instruments, Edge Devices, LoRa Hardware
Data & Networks:	MariaDB, Microsoft SQL Server, Modbus RTU/TCP, SLMP, Ethernet/IP, Tailscale VPN, MQTT, COMMUNICATION
Core Competencies:	Client Dealing, Customer Handling, On-Site Field Commissioning, Troubleshooting

PROFESSIONAL EXPERIENCE

Application Engineer | JTEKT Electronics India Pvt. Ltd. | Gurgaon, HR

Dec 2024 – Present

- Product Installation & Commissioning:** Executed end-to-end field commissioning of a multi-node, LoRa-based Energy Monitoring System (EMS) linking 200+ energy meters across JIN Dharuhera 1 & 2 plants.
- Customer Site Management:** Frequently worked directly at customer sites, actively managing client dealing and customer handling to ensure automation solutions aligned with operational requirements.
- System Architecture Integration:** Interfaced industrial SCADA platforms (JSS) with PLC units (Kostac - SJ SERIES) and human-machine displays (C-more, SCA2) for robust shop-floor automation.
- Advanced Troubleshooting:** Spearheaded on-site diagnostics of automated production assets, resolving critical networking, sensor, and logical anomalies to reduce plant downtime.
- Client Training:** Formulated specialized instruction modules and guided client operations teams through complex software, sensor mechanics, and layout handovers.

KEY INDUSTRIAL PROJECTS

Special Purpose Machine (SPM) Programming / Demeter (Bangalore) & Allegion (Norway)

Programmed complex SPM systems for international and domestic clients. Implemented and tested the Program for the machine Online conducted direct client communication, and provided comprehensive technical handovers.

Real-Time Energy Monitoring Framework (EMS) / JTEKT India (Dharuhera 1 & 2)

Designed a facility-wide data-acquisition architecture using Kostac PLCs. Interfaced hardware nodes with central databases to populate live analytical dashboards for plant leadership.

Traceability & Andon Notification Architectures / JTEKT India (Dharuhera & Bawal)

Programmed low-latency status systems utilizing Mitsubishi PLCs and remote HMIs to log quality metrics, expedite immediate operator dispatch, and prevent defect routing.

PROJECTS

SPM programming for Endurance Shifter Bench Testing Machine, Security Test Machine for Dover-Allegion

Energy Monitoring System

ANDON SYSTEM

STOP-CALL-WAIT ANDON SYSTEM

EDUCATION

Jodhpur Institute of Engineering

Bachelor of Technology (B.Tech) in Engineering | 2021 – 2025 | Score: 87%

Senior Secondary School (12th Standard) — CBSE Board | Score: 81.7%

Secondary School (10th Standard) — CBSE Board | Score: 82.8%

COURSES, CERTIFICATIONS & LANGUAGES

- Learning Python
- Languages: English (Professional Proficiency) and Hindi (Native Fluency)
